

# LaTeX Error and Formatting Log

Documented issues, diagnosis, and final corrections

**Project:** Benchmarking Factual Accuracy of Large Language Models Across Scientific Domains

| Error / Problem                            | Likely Cause                                                                       | Prism Suggestion                                                          | Final Correction                                                                                      |
|--------------------------------------------|------------------------------------------------------------------------------------|---------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| Undefined citation keys                    | Citation commands did not match bibliography keys.                                 | List all citation keys and compare them with references.bib.              | Standardized citation keys in main.tex and created matching references.bib entries.                   |
| Undefined references / incorrect placement | Labels were missing or placed outside figure/table environments.                   | Add labels immediately after captions and use \ref commands.              | Added labels for sections, the benchmark table, and the TikZ figure; used Table~\ref and Figure~\ref. |
| Table overflow risk                        | Long text in benchmark cells exceeded the A4 text width.                           | Use tabularx with fixed-width first columns and flexible text columns.    | Replaced the wide tabular layout with tabularx and compact spacing.                                   |
| Figure margin / float placement risk       | TikZ nodes and arrows could extend beyond the page or float away from Section 4.3. | Use explicit coordinates, compact nodes, and a controlled float position. | Used bounded TikZ coordinates, compact node widths, [\htrp], and \FloatBarrier.                       |

**Validation note:** The source package contains main.tex, references.bib, and the sequential evidence screenshots. The provided compiled manuscript PDF is included as the Prism and Overleaf final-paper artifact.
